

Rdesktop / Utscc connection to Windows 10 client

Posted by admin - 2016/07/22 13:02

Was having problems getting Win10 desktop connection. After searching for a little while found this tidbit

that solved the problem. From:

<https://social.technet.microsoft.com/Forums/office/en-US/8d02bd1e-6f3a-4b80-adbb-c70983c8878e/remote-desktop-connection-problem?forum=winservergen>

Change value of HKLMSYSTEMCurrentControlSetControlTerminal
ServerWinStationsRDP-TcpSecurityLayer

from value of 2 to a value of 1

This is reducing the security level for RDP on this machine, so beware.
